

Effitek

Name Anti-barking collar with electrostatic stimulation

Kit Contents

- 1 Anti-barking Effitek Collar
- 1 Collar Strap
- 1 3V Battery
- 1 Token to open battery door
- 1 User Guide
- 1 Guarantee Card to be completed

Caracteristiques:

- Guaranteed 2 years*
- 100% French Made
- 3 operating modes
- Suitable for all sizes of dog
- Weight of collar: 80g
- Dimensions: 167mm x 127mm x 54 mm
- 8 Levels of stimulation

How it Works

A beep sound precedes electrostatic stimulation, so that the dog establishes the link between the beep and the electrostatic stimulation. With the first barking, a beep and an electrostatic stimulation of level 1 are emitted, preventing the dog. If the dog continues to bark in the 10 seconds, it receives the one second electrostatic stimulation of level 2. The incrementing is done, until the barking stops. The electrostatic stimulation increases on its level of sensitivity. The level of stimulation to which the dog ceased barking is kept in memory until the next barking. If there is no barking during 5 minutes, the intensity of stimulation goes down from its level, and this so on up to level 1. The collar automatically controls the level of electrostatic stimulation according to the sensitivity of the dog and the frequency of its barking.

Stimulation Levels

- Beep: Prevents the animal level
- Level 1 and 2: stimuli disrupts = surprise effect (level of alarming the dog)
- Level 3 to 8: stimuli aversive = punishment

Operating Mode:

- Mode 1 = Sound beep + electrostatic stimulation
- Mode 2 = Sound Beep only
- Mode 3 = Electrostatic Stimulation only

Advice

- Do not leave the collar around the dog's neck for more than 8 hours a day
- Do not use on puppies under 6 months
- If in doubt, ask advise from a veterinarian or a behaviour specialist
